Experience

Freelance Software Engineer   Handsome Hand   New York, NY | Nov 2020 - Current
- Delivering 25 ReactJS components on-time and under budget for clients.
- Reducing deployment time by 2x through implementation of Netlify.

Volunteer Software Engineer   Femmecubator   New York, NY | Jan 2021 - Current
- Collaborating with UX/UI and the engineering team to add checkboxes for user sign up.

Freelance Wix Web Developer   One World Acupuncture   New York, NY | Mar 2019 - Apr 2020
- Integrated Wix payment platform enabling patients to make appointments with credit card and paypal.
- Designed a dynamic web page, optimized navigation and search engine optimization that resulted in the first result in google search, a 500% increase in visits and a 300% increase in profitability over 6 months.

Freelance Wix Web Developer   Sensei Fine Arts   New York, NY | Oct 2018 - Mar 2019
- Designed and coded application components with responsive pages for users to navigate gallery's data.
- Gathered requirements from client and proposed product solutions to drive revenue.

Software Engineering Projects

Hae Nyeo Spa Appointment   website | github | demo video
- Leveraged React Router and Redux to allow users to book and update spa appointments without refresh.
- Added interactive floating SVG objects for a playful user experience.
- Improved deployment time by 4x and practiced CD by using Netlify.
- Managed GitHub repositories and permissions and project-managed using agile processes.

M-Wine Tasting Review   website | github
- Built an interactive sunburst wine tasting chart using D3 and Observable so users can explore and record their sublime wine tasting experience.
- Leveraged React JS to allow users to dynamically add reviews without page refresh.
- Decreased time spent on visual design by 20 hours by adding Semantic UI.

Growth Mindset Quote   website | github | demo video
- Built a full stack web app using JS, Ruby and deployed on Github.io to allow users to explore the web page.
- Achieved responsive design on mobile and 5 different desktop browsers writing custom and dynamic CSS.
- Defined PostgreSQL schemas for users, quotes, author, images, and likes.
- Reduced Heroku costs by $25 per month through adding a custom CSS loader.

Education

Flatiron School   Software Engineering   Brooklyn, NY | Apr 2020 - Sep 2020
Received full scholarships from NYC Tech Talent Pipeline for excellence in computer science

New York University   Steinhardt School, B.F.A. Studio Art   New York, NY | May 2014
Dean's List. Awarded academic scholarship
